

Everything Digital

Glass & Mirror Case Study

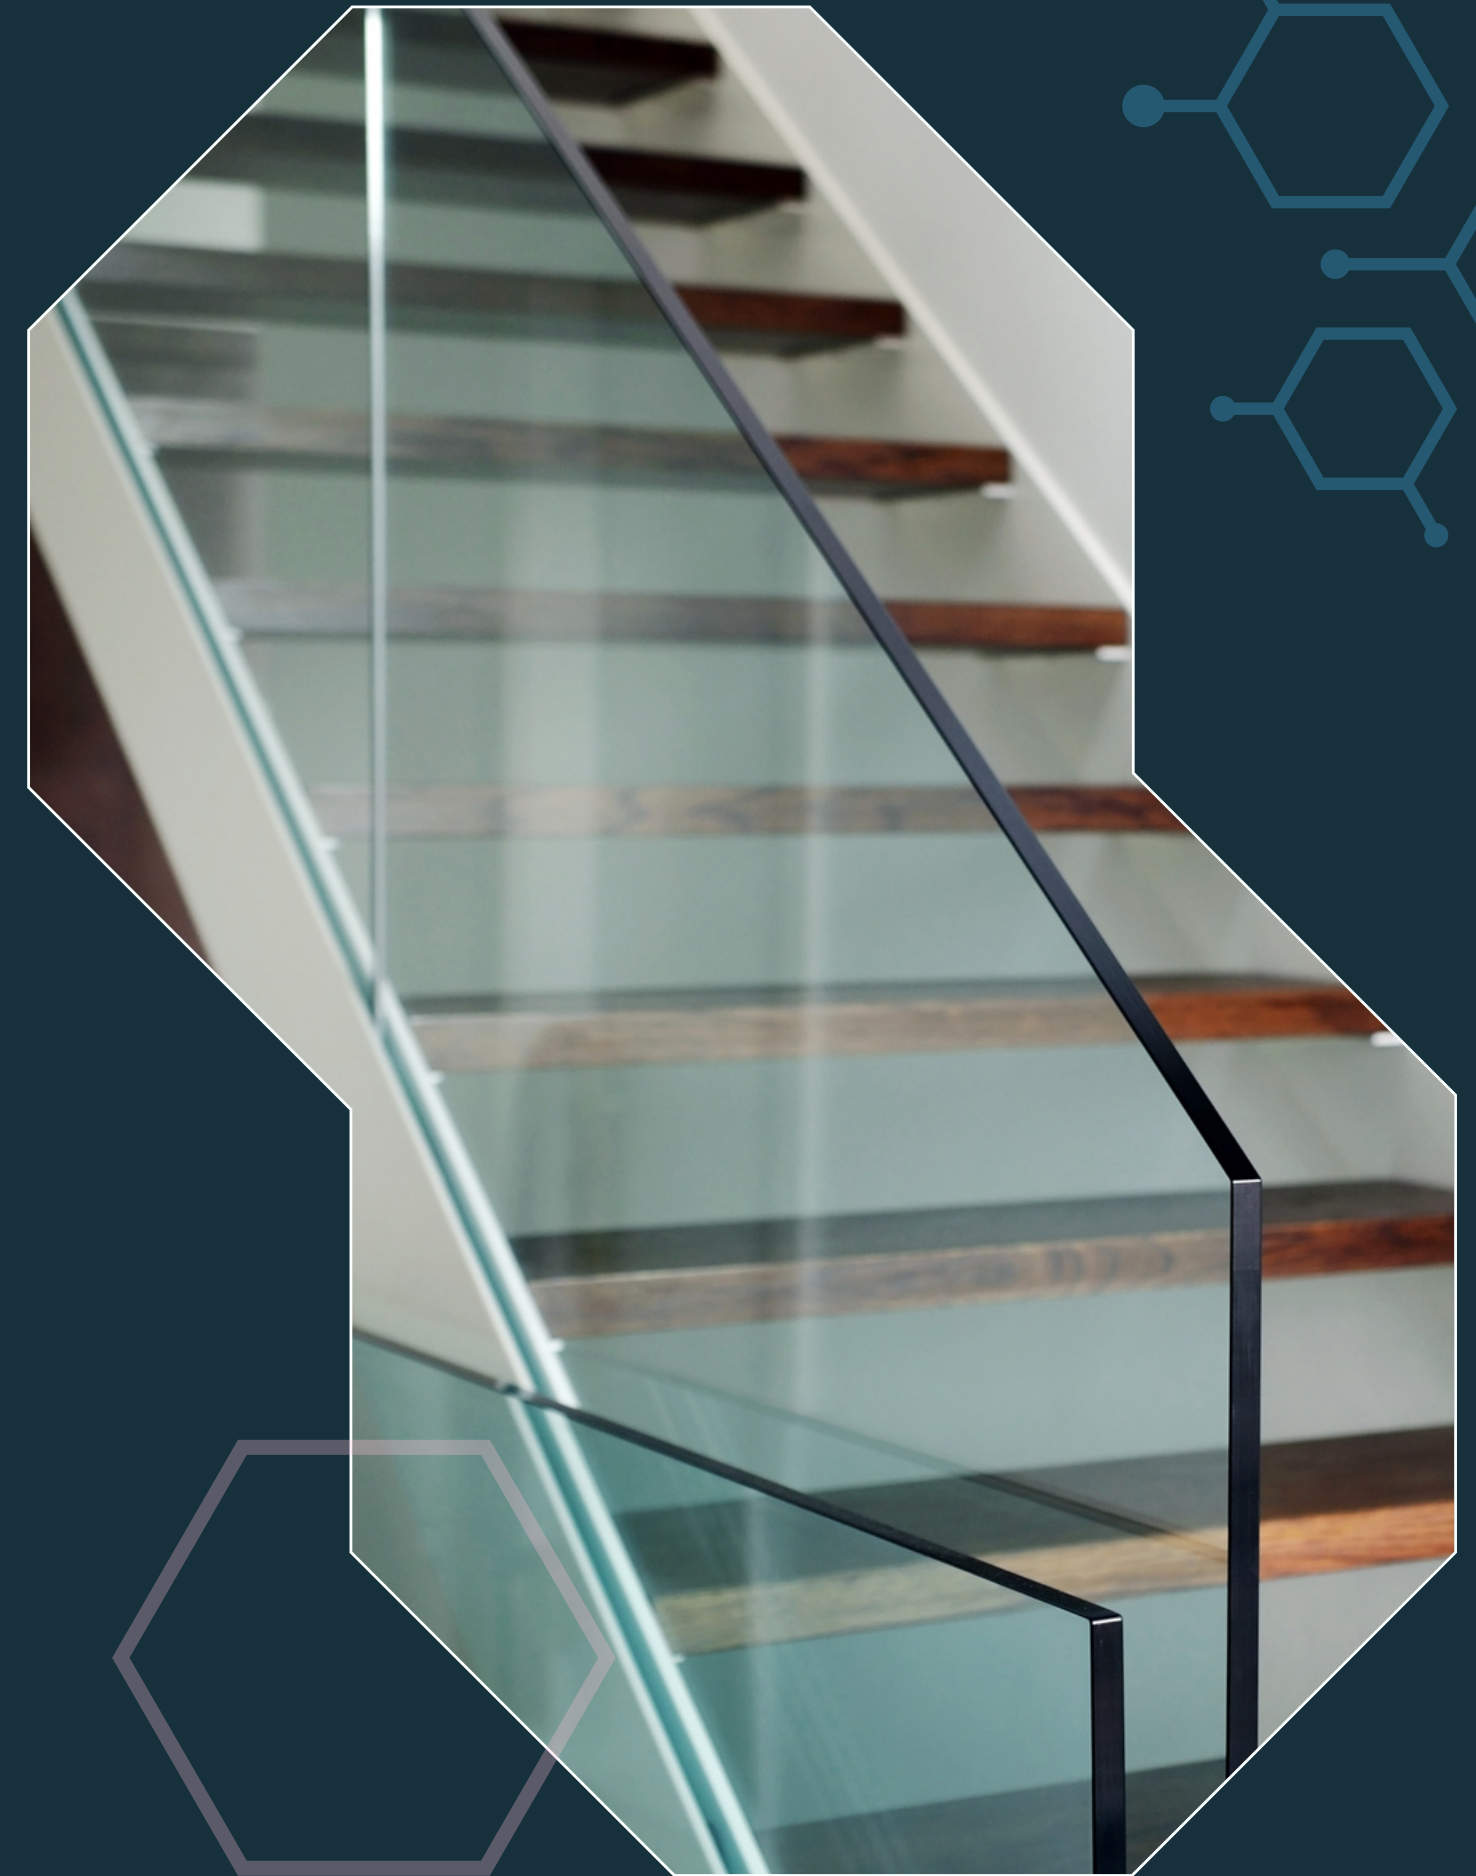

Glass & Mirror

Glass and Mirror Technology have been a long standing client with Everything Digital. When we first started working with Glass and Mirror Technology, we were commissioned to build a chatbot that would help their surveyors record data from jobs.

After this, we built their website to help optimise it for more conversions. Now we run their Google and Facebook Ads, generating form fills and phone calls.

Don't Take It From Us

"We were originally interested in Everything Digitals ability to create a chatbot that would help our surveyors to record information and send it back to the office, whilst they were on site.

This quickly grew into us using other services with Everything Digital and getting their help to generate leads for the business through Google and Facebook Ads. Great company, hard working staff, brutally honest, what more could you ask for?"
